

OLI Simulation Conferences

OLI has been the host of several Simulation Conferences. These conferences are unique in that it is a chance to hear about new simulation techniques that you can adapt to your own use.

An OLI Simulation Conference is:

- ✓ A learning experience
- ✓ A networking opportunity
- ✓ A time to get inspired!

Scientists, engineers and researchers join professors and OLI technologists in an information exchange about state-of-the-art techniques in electrolyte simulation. Three out of four presentations are client presentations, and that brings incredible range and diversity to the ways OLI can be applied to electrolyte challenges.

Recent Conference Proceedings

Most of our client presenters agree to share their presentation materials following the Conference. OLI has compiled these presentations to produce conference proceedings.

Please check some of the topics covered in our past conferences, and ask us about any follow-up questions you might have.

[OLI Simulation Conferences](#)

- 2016: A world of opportunity
- 2014: Making a difference with electrolyte chemistry simulation
- 2012: Adventures in electrolytes
- 2010: Harnessing the power of the OLI Engine

THINK SIMULATION! Getting the chemistry right

OLI Systems, Inc., 240 Cedar Knolls Road, Suite 301, Cedar Knolls, NJ USA 07927
